## Supreme Officers of S.O.E.

## Entertained at Lethbridge

Lodge "Pride of Alberta, No. 287," Sons of England Benevolent Society, under a grand reception to the Supreme President and Supreme Secretary of the society at Lethbridge on Friday night, which consisted of the best array of edibles and eloquence ever produced in the prairie land.

After a regular meeting of the society, which was largely attended, the spreading of several tables with all the good things required for the sustenance of life was undertaken by the members of the Daughters and Males of England "Queen of Alberta Lodge."

The toast list was left in charge of Bro. D. H. Elton, whose ability as a toastmaster added much to the success of the occasion.

His Worship the Mayor responded to the toast to His Majesty the King in a very fitting manner.

Bro. Elton introduced the honored heads of the Order and Bro. E. A. Miller, supreme president, delivered a pleasing and fitting reply, bearing upon the mission of the supreme officers to the West and the pleasure it afforded them to witness the great spirit of zeal with which every branch of the Order was striving to seek out existence in a manner that would best benefit the society and mankind.

Bro. Miller referred to the great studies made by the society of the Sons of England since its birth about 35 or 40 years ago, when a body of five or six Englishmen were impressed with the idea of a fraternal brotherhood that might tend to link together men of English birth or English ancestry whose lot had been cast upon a Canadian soil. One of the founders of that grand idea was the present Supreme Secretary, John W. Carter, who after some thirty-five years or more devoted almost solely to the interests of the society of which he was generally recognized the father, and having already passed the threshold of man's allotted time, was spared to appear before us in apparent vigor and prime of life.

No man in the city of Toronto or in the whole Dominion was more widely known or highly esteemed than was the Supreme Secretary of the Sons of England society. During his thirty-five years as Supreme President the society had grown from a small group of 6 to a membership of upwards of 40,000, spread in its influence throughout the major portion of the British Empire. The beneficiary department, which was instituted a number of years ago, possessed a most creditable record. From the widows and orphans fund there had been added since the creation of the fund upwards of \$2,500,000 in funeral benefits or the relief of widows and orphans, while at the present time from the department alone there was being paid out monthly upwards of \$4,000, and there was yet remaining in the bank to the credit of the department a substantial sum of over \$40,000. Last year the membership of the Order increased by 6,029, which was double that of any previous year and greater than the growth of any other fraternal order in the Dominion of Canada. Bro. Miller stated that one of the chief objects of their visitations was to witness the official efficiency in the workings of the lodges and confering degrees, and he complimented Lodge Pride of Alberta on the very capable manner in which their ritualistic work was put on.

John W. Carter, the grand old man who has braved thirty-five years of devotion to the Sons of England society and who is loved and admired by every member of the organization in Canada and the Empire, addressed the gathering in the capacity of Supreme Secretary. His remarks were forcible and argumentative, dealing chiefly with the high ideals of the society and the duties expected of every member of the great brotherhood for the uplifting of the British flag and the protection of British citizenship. He did not believe that a Britisher could be a true Canadian and not be loyal to the British flag and Constitution. As Canadians we were a nation within a nation and the greatest arm of the whole empire. As

Englishmen we were duty bound to uphold good citizenship—to promote all British culture, and the Sons of England Benevolent Society meant more than any other institution for the upbuilding of a true Canadian citizenship. We have a magnificent institution, and by supporting and helping it we help every other institution which has for its object the benefit of mankind. "We are most democratic," he declared. "Our aim should be to work for some other's good. Our motto should be to love the brotherhood, fear God and honor the king." Every man was created for some good purpose and unless that purpose is carried into effect life is simply wasted. He had devoted nearly two score years to the interests of the Sons of England Society and although at present up in his 73rd year he felt that he was to be spared for yet many more years' consecration to the history of his life. The principles of our beloved order formed an ideal and a standard as high as it was possible for man to attain. In our handling together and protecting those principles we were carrying out a great purpose, one that would redound to the protection and promotion of our own good citizenship and to the honor of our flag and country.

Bro. F. T. Robbins, P.G.P., D.D., responded to the toast of "The Grand Lodge of Alberta" in a pleasing manner. C. F. P. Conybeare, K.C., D.C.L., Dr. J. Stewart, M. L. A. and D. H. Elton, pledged the toast of "Our Empire." His address was one of eloquence, glowing with tribute to the British Empire and the great task of our colonization. He referred to the agitation being on for the teaching of languages other than the English in Canadian schools. Canada had a splendid system of schools, in fact the best in the world. He said that we should endeavor to Canadianize the foreign immigrants and to accomplish such only the English language should be instilled by our schools.

W. A. Buchanan, M.P., replied to "The Dominion of Canada," with Dr. J. Stewart, M.P., represented "The Province of Alberta." Both speakers delivered stirring addresses.

Major Handie responded to "Lethbridge—our home." He offered the freedom of the city of Lethbridge to the distinguished heads of the Sons of England society, and hoped that their visit to the "Pride of Alberta" would afford them great pleasure.

W. C. Ives, as president of the Board of Trade, was co-responsible to "The City." He referred briefly to the grand institution over which the distinguished visitors were the honored heads. He said that in the City of Lethbridge there was a lacking of loyalty to our grand old Union Jack, and thus to our sovereign king. On Imperial or civic holidays it was noticeable that ninety per cent of the flag poles of the city were naked of the flag that braved the battle and the breeze, and felt that failure in this means of expression of loyalty was a fact to be regretted. As a nation in an empire we should endeavor to uphold the flag, the emblem of our country's greatness. He welcomed the visitors to the city and on behalf of the Board of Trade desired to assist in any way in showing them around the city.

Bro. C. E. Sydal, V.P., moved the toast to "The Daughters and Males of England."

An original song entitled "S. O. E." was rendered by D. H. Elton. Songs were also rendered by Bros. Westley, Kealey, Standing, Gibson, and Weaver.

On Saturday, under the auspices of the Board of Trade, the visitors were shown through the city and satored around the country.

They returned north to Edmonton and retraced their path back to Macleod, where on Wednesday night they were joyfully received by a joint assemblage of members of Cowley, Pincher Creek, and Macleod lodges.

A GOOD INVESTMENT  
W. D. Magill, a well known merchant of Whitford, Wis., bought a stock of Chamberlain's medicine so as to be able to supply them to his customers. After receiving them he was himself taken sick and says that one small bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy was worth more to him than the cost of his entire stock of these medicines. For sale by all dealers.

The Blairmore council meets on Monday night next.

## Sunday School Picnic To Crows' Nest

A grand picnic and excursion will be held under the auspices of the Anglican Sunday schools of the Macleod Deanery on Tuesday, July 22nd. The picnic and sports will be held at Crows' Nest and the special excursion train leaving Macleod will arrive at Hillcrest at 10:10, and at Blairmore 10:35 a. m. Returning the train will leave Crows' Nest at 6:35 p. m. Special return fares: Hillcrest return, adults, 80 cents, children 50 cents; Frank and Blairmore return, adults 50 cents, children 25 cents. All kinds of games, including baseball, football and tug-of-war, will be held, and those who attend are assured of a right good time.

## Another Marathon Race

Saturday afternoon's marathon was watched with considerable interest and the "holos" availed of the opportunity to be recognized as honored spectators. One of the competitors—an unassuming, stunted grown, gin checked son of the Emerald Isle—undertook a wager to outpace a printer, haggard looking, bleached, tall and lanky. With them a member of the ladies department of a leading mercantile establishment, a shirt reliever from the Cosmopolitan hotel and the pioneer legal light of Blairmore lined up, each in the order of their importance in life.

At the sound of the starting gong the professor of law would lag behind, but some "spirit" seemed to prompt his inner man that he was as well equipped as a marathoner as any of his side-kickers and manly held the lead. The ladies clerk was also struck with a sense of imagining himself a racer of repute. He hung onto the coat-tail of his lawyer friend, and when the latter laid down to take a "swig" or other opportunity would offer he would pace towards the goal. At the start the Emerald Islander and the printer paced off side by side, but ere the finish the printer quit his laurels and acknowledged the Englishman victor over all save the druggist. The Englishman covered the distance of four miles in exactly 23 minutes, and is thus entitled to compete for the world's championship.

## Sydney Miners Out on Strike

Sydney, N. S., July 8.—Fifteen hundred miners at Sydney mines went out on strike this afternoon. The cause of the strike is that no horses are supplied in some of the mines and practically all of the work of hauling cars, shovelling and filling falls on the miners. Three of the collieries are worked by the provincial workmen's association which took the initiative in the matter. Manager T. L. Brown assured the men that the matter would be laid before the directors today. The men will resume work pending decision of the directors.

## Oddfellows Institute at Cayley

A lodge of Oddfellows was instituted at Cayley on Wednesday night, July 9th. R. Hill Fairley, grand master of the Grand Lodge of Alberta, and other grand lodge officials took part in the ceremony. The degree team of High River lodge conferred the various degrees.

 In Summer  
 Save where a fence breeze blows the wheat  
 And set it blowing like a river,  
 The steady beat of ardent heat  
 Kept all the air a-quiver.

The brooklet sends its merriment  
 While dancing down the rocky meadow,  
 Where lilies wait, it silent went,  
 All flecked with shine and shadow.

Amid the sky hawks drifted by,  
 And swallows darted, rising, falling,  
 The cricket's cry rang shrill and high,  
 And quail kept calling, calling.

Grim Monarch Cares might rule else-where,  
 We watched the clouds go trailing over,  
 A placid, rare peace filled the air  
 And far-borne scent of clover.

Thousands of mothers can testify to the virtue of Mother Graves' Worm Expeller, because they know from experience how useful it is.

Eddy, little Bobby's playmate, was asked by a motion picture company to pose for it. Later, when the picture was produced, Bobby went to see him. Eddy played a thrilling role of escaping from the pantry with a glass of jam just before his aunt went in to check on him.

Bobby sat through the show, eyes fixed on the screen, and when the picture was over, he said to his aunt, "I want to be just like Eddy."

The manager of the show, becoming curious, asked the reason, and Bobby replied: "Some day that woman's gonna catch 'em, an' I wanna see the fun."

More Ancient.  
 They say that chess is the oldest game, remarked an Old Fogey.  
 Poker is older than chess, said the Wise Guy.  
 How do you know? asked the Old Fogey.  
 Didn't Noah draw to pairs on the ark and get a full house? replied the Wise Guy.

## Preserving Fence Posts From Decay

Wood-rot, in all its forms, is due to the action of fungi working under suitable air and moisture conditions. In fence posts these conditions are most favorable at or near the surface of the ground and hence it is there that decay first starts. Some woods, like the cedar and tamarack, are more resistant to fungus attack and may last, as fence posts, from eight to ten years. Unfortunately, however, the supply of these woods has become very scarce and the farmer is faced with the alternative of importing durable material at a high price or of applying preservatives to the common non-durable woods which grow in his own wood lot.

Crescote, a dead oil of coal tar, is perhaps the best preservative for this purpose, as it does not dissolve out of the treated wood, when in contact with moist earth. It costs from eight to fifteen cents per gallon.

There are two methods of applying the crescote but before either method can be applied it is necessary to have the posts well seasoned if the results are desired. This seasoning is best accomplished by peeling the bark from the posts and exposing the wood in loose piles in the open air for several months, so the amount of water in the wood may be reduced to the smallest per cent possible.

The Brush Method consists in applying the crescote to a coat of paint to the lower portion of the post, up to a point six inches above the ground line. The crescote being first heated to one hundred and eighty degrees Fahrenheit. Two or more coats may be applied, as the farmer is allowed between each application for the crescote to soak into the wood.

What is known as the Open Tank Method, while more expensive, secures deeper penetration and gives better results especially when the posts are split or checked. The crescote is heated to boiling point in a metal tank and is then poured into a simple and effective apparatus can be made by boring two holes, about the size of a water-tight barrel and screwing into these holes two pieces of iron piping three to four feet long which are connected by a shorter vertical pipe with two elbow-joints, thus forming a complete circuit somewhat resembling the handle of a mug.

The barrel is then filled with enough crescote to cover both upper and lower horizontal pipes and a fire is kindled under the lower horizontal pipe which heats the crescote in the pipes and creates a circulation which continues until all the crescote with the barrel is at boiling-point. The barrel is then placed in this boiling liquid for about five hours after which they are immediately transferred to the barrel of crescote, or else the fire is put out and they are allowed to remain in the tank until the crescote becomes thoroughly soaked.

In this process the preliminary heating drives some of the crescote out of each wood-pore and when the posts are allowed to cool in the crescote, a partial vacuum is drawn in the pores and the crescote is drawn into every fibre. Poplar posts, which ordinarily last but to four or five years, when treated in this way last twenty years and the same applies to all other free sap woods. Further information can be obtained on application to the Forestry Branch, Ottawa.

"Sometime later my daughter, then about twelve years of age, had been working very hard at school and her health gave way. She was weak and listless and her hands and face were badly swollen. We were forced to drop her setting-in. However, we started to give her Dr. Williams' Pink Pills and she was soon quite well again. I always recommend Dr. Williams' Pink Pills to any suffering as she did, knowing the benefit our family received from them."

"Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail, post paid, at 50 cents a box or six boxes for \$2.50 by writing The Dr. Williams' Medicine Co., Brockville, Ont."

Fifty-five whales, yielding \$250,000 were killed in the North Pacific. But it is represented that if whales are decimated the millions of herrings that now stay close to the shore to escape the predatory big fish will venture into deep water, the salmon which live on them, will follow, and the salmon industry will be menaced, if not ruined. This is as bad a complication as any foreseen by manufacturing interests from tariff reduction and obviously points to the need of prohibitive tariff of some kind on whaling for the protection of salmon fishing.

A motion picture show arranged under the supervision of the directors of the Children's Aid and Protection Society of Vienna took place in that city recently. It letted the cause a large sum of money and furnished a fine feature. At the close of the film programme the spectators were requested to remain seated so that a film might be shown with portraits of many persons known to those present. It was a picture of the past arriving at the theatre, taking their places and waiting for the first number. The picture was shown in two hours, and was the feature of the occasion.

Sixty-year-old Dick was preparing, much against his own sweet will, to go calling with his mother. It was the first time that Dick had been allowed to get himself ready alone, and together with his mother, he was going to go visiting, he felt the importance of the situation. After having put on his hat and coat he suddenly remembered something, and called downstairs: "Mother, shall I wash my hands or wear gloves?"

Motor automobiles in a gasoline engine outstrip a dynamo to provide the motive power are proving successful in London and Liverpool.

## Plenty of It

But do you think your daughter would succeed on the stage? Has she enough of the artistic temperament? Oh, yes, plenty of it. When she was five the dishes on the table's day last week she flew into a tantrum, and smashed the best salad dish we had in the house.

Nice  
 Willie's Mamma—Is James a nice boy for you to play marbles with? Willie—Sure, I can beat him every time.

Miller's Worm Powders act mildly and without injury to the child, and there can be no doubt of their deadly effect upon worms. They have been in successful use for a long time and are recognized as a leading preparation for their purpose. They have proved their power in a number of cases and have given relief to thousands of children, who, but for the good offices of this superior compound would have continued weak and feeble.

I seem to remember that lady, who is she? She was my typist last year. She's charming. Why did she leave you? She was too conscientious for me. One day I proposed marriage to her, and what do you think she did? She took all that I said to her heart and brought it, nicely typewritten, for me to sign.

## ROSY CHEEKS STRONG NERVES

Should be the Birthright of Every Woman and Growing Girl.

Many women and growing girls who should have bright eyes, rosy cheeks, strong nerves and elastic step, and a good appetite, are seen to decline in health. Their spirits grow sluggish, the cheeks become pale, temper fitful, and the nerves over-sensitive. They may have inherited a tendency to ill-health, or they may have over-worked, over studied or worried until the strength of the body was not equal to the demands made upon it.

To guard against a complete breakdown in health the blood must be kept pure and rich. No other medicine can do this so well as Dr. Williams' Pink Pills, for they act both on the blood and the nerves, restore the appetite and keep every organ toned. All women cannot rest when they are ill, and this strengthens the blood. It is with every woman, especially important that the every stage of a woman's life the blood supply be kept pure and rich. The value of Dr. Williams' Pink Pills is well illustrated by the case of Mrs. David Chambers, Bennett, Ont., who says: "Some years ago I suffered greatly from impoverished blood. I was very pale and thin and my health was poor. I took a lot of doctor's medicine without getting any benefit, and at last decided to try Dr. Williams' Pink Pills. I had heard highly recommended. It was not long before I began to feel better, and after taking a few more I was well. My health was fully restored, and although some years have now passed, I continued strong and healthy, and I think I owe it entirely to Dr. Williams' Pink Pills."

"Let's Go—  
 First Broker—Did you win or lose in that big drop in stock?  
 Second Broker (tightly)—That is my business, sir. Say, can you get me to a five-cent lunch counter?"

But doesn't your friend do anything at all?  
 Oh, yes; he worries.

## Dr. Morse's Indian Root Pills

are made according to a formula in use nearly a century ago among the Indians, and learned from them by Dr. Morse. Though repeated attempts have been made, by physicians and chemists, it has been found impossible to improve the formula or the pills. Dr. Morse's Indian Root Pills are household remedies throughout the world for Constipation and all Kidney and Liver troubles. They act promptly and effectively, and

## Cleanse the System

## Jumping Fish

Jumping as a means of locomotion is shared by a variety of animals of widely different classes. Kangaroos and jerboas among the mammals, thrushes and robins among the birds, as well as such familiar forms as frogs, crickets, crickets and flies all illustrate this phenomenon to leap, usually as a means of getting quickly over the ground, and even lions and tigers, which never spring in ordinary circumstances, readily adopt this method of attacking their victims. A considerable number of fishes are remarkable for their leaping powers, and several of these performers are on that account specially favored by anglers, since by jumping clear of the water, in some cases many times in succession, they tax the fisherman's skill more severely than fishes less active, and thereby give added zest to their capture.

Members of the salmon family are universally famous for their high jumps. The sea trout, which glides Devon waters under the seasonable name of "barrel" and are unerring acrobats, and a fish of a pound weight will more than jump several times its own length out of the water when hooked before coming to the net. Unless the fisherman responds promptly by lowering the top of his rod, the fragile gut is likely to break, and as it is part of every sportsman's creed to appreciate his pastime in proportion to the difficulties it presents, the sea trout stands high in the angler's estimation.

At their best salmon can jump at least ten feet above the surface, a feat achieved by displacing the water with the powerful tail and flexing the body until the head and tail all but meet.

The grandest of all these leapers is the tarpon, otherwise "silver king," or "grand scullie," a monster herring which may measure six or seven feet and weigh 200 pounds.

A lawyer in court occupied the whole day with a speech which was anything but interesting to his auditors.

Some one who had left the court room and returned again after an interval of some hours, finding the same harangue going on—said to the opposing lawyer: "You're taking up a great deal of time?"

Time, was the answer; he has long ago exhausted time and enervated upon eternity.

Small Charlotte, not yet four years old, was gifted with so vivid an imagination that her mother began to be troubled by her fairy tales, and felt it time to talk seriously to her upon the beauties of truthfulness.

Not sure of the impression she had made, she closed with the warning that God could not fore a child who spoke untruthfully, and would not want her in heaven.

Charlotte considered a moment and then said: "Well, I've been to Chicago once and to the theatre twice, and I don't suppose I can expect to go everywhere."

First Broker—Did you win or lose in that big drop in stock?  
 Second Broker (tightly)—That is my business, sir. Say, can you get me to a five-cent lunch counter?"

But doesn't your friend do anything at all?  
 Oh, yes; he worries.

**British Conservatism**  
 An inquisitive member of the House of Commons was struck one day by the presence of a policeman in one of the lobbies. He wondered why this particular lobby should always have a guardian strolling up and down and made inquiries. The records of the House were searched and it was found that fifty years previously when the lobby was being decorated, a policeman had been stationed there to keep members from soiling their clothes. The order never having been countermanded, the constable had kept his beat for half a century.

Four-year-old Helen wished to get into the play-room, but the gate which had been put at the door to keep her baby brother in was locked. She tried again and again to climb over it, when at last her mother heard her say: "Dear God, please help me get over this gate. Just then she tumbled over and said: Never mind, I got over myself."

Playwright—I want a hat-size 8.  
 Hatter—Mr. Pen, you always wear size 6.  
 Playwright—Sir, I know what I want; my comedy was a success last night.

First Coster (outside picture dealer's window)—Who was this "ere Nero, bill? Wasn't he the chap that was always cold?  
 Second coster—No; that was Zero. Another bloke altogether.

You have never suffered from financial reverses? No, replied Mr. Dustin Stax. Finance is like dancing. When the market turns around and goes the other way you must reverse with it.

Customer—I want a novel good for summer reading.  
 Book Clerk—Here's just the thing. A detective story that will make your blood run cold.

**FREE OF LUMBAGO**  
 Because He Took GIN PILLS  
 Mr. H. A. Jukes of Winnipeg writes: "I have been a sufferer from Lumbago for some years past. I met your Mr. Hill and he advised me to take GIN PILLS. I have been taking them at intervals during the early part of the present winter, and up-to-date have had no return of my old trouble—in fact I feel better than I have for years, and think that my old enemy has vanished for good."

Get box 6 for \$2.50. Sample 1/2 if you write National Drug and Chemical Co. of Canada, Limited, Toronto 130

**Concrete is the best building material**

A BROAD statement—Yet literally true. The aim of man from the beginning has been to make his building materials as nearly like natural stone as possible. The great labor required to quarry stone led him to seek various manufactured substitutes. The only reason he ever used wood was that it was easiest to get and most convenient to use. Wood is no longer easily got. Like most building material, its cost is increasing at an alarming rate. The cost of concrete is decreasing. So, from the standpoint of either service or economy, Concrete is the best building material. Canada's farmers are using more concrete, in proportion to their numbers, than the farmers of any other country. Why? Because they are being supplied with

## Canada Cement —

a cement of the highest possible quality, which insures the success of their concrete work. The secret of concrete's popularity in Canada lies in the fact that while we have been advertising the use of concrete, we have also been producing, by scientific methods, a cement so uniformly high in quality that the concrete made with it gives the complete satisfaction our advertisements promised. Concrete would not have been in such universal use today, had an inferior grade of cement been supplied. Indeed, getting Canada Cement is your best assurance of thoroughly satisfactory results from your concrete work. There is a Canada Cement dealer in your neighborhood.

Without this label it is not Canada Cement. Beware of cheap imitations. "What The Farmer Can Do With Concrete"—No farmer can afford to be without a copy.

Canada Cement Company Limited - Montreal

## AN ODD CONCEIT.

The Sleeve Makes  
the Smart Gown.

OF CHIEF DE CHIEF AND BROAD.

Blue crew de chie makes this very pretty gown, combined with blue headed silk patterned with a busy design in American Beauty shades of red. The novel note of the costume is to be found in the long monochromatic sleeves of the broad silk. Touches of the same silk are introduced in a panel at the side of the skirt. The model color and surprise fabric are of cream colored net.

## HEADACHE CURE.

Common Sense Living and Right Thinking Remedy For Most Ills.

There are two attitudes of the housewife to a headache. She makes it an excuse for shifting her duties, neglect of her house and general discomfort of her family, or she accepts it as inevitable and runs her house with needless pain and discomfort to herself.

There may be occasional women who must be a martyr to headache. The majority will find the pain curable if the cause be traced. Do not think "Another of my awful headaches!" and grit your teeth for bearing with what philosophy you can. Far more to the point is it to think, "Why should I have another?"

Most headaches can be cured by common sense living and ordinary care of the functions of the body. In treating a headache, first find out the cause.

If the housewife awakes with a headache each morning she may be short of ventilation in her room. Let her fear of draft or consideration of linings or furniture lead her to sleep with closed windows. Nor should she think window raised an inch or two meets fresh air needs.

Anemia causes headaches. If the blood is thin and the flow sluggish you are sure to be a martyr to your head. Plenty of exercise, especially in the open air, and a good blood tonic will soon work a cure. Women of sedentary life, who often find their brains overworked, are especially prone to this type of headache.

Overwork, overwork and fretting are prolific causes of headache, especially with the nervous, high strung woman, who takes too much out of herself, then generally takes the rest out of her family. Considerate hospitality, learning to let things slide, more rest and sleep and an acquired philosophy.

## Heel and Toe Protectors.

Stinkings and socks now have detachable heel and toe portions, which can be removed from the sock or stocking and similar portions substituted for them when they become too worn to be required. These detachable portions are made of a soft material and are interchangeable for both heel and toe, avoiding the necessity for utilizing or keeping two different kinds of spare socks for the heels and the other for the toes of the socks or stockings. The spare portions are knitted together in one piece, which makes them less liable to become mislaid or lost, as would be the case of a number of separate portions.

## A Hidden Trick.

Aunt Nancy from the Virginia says: "This isn't one of us but what ain't got a streak of pure cussidness what wear in deer bones, but so long as it's done kept hidden in" we don't give it no chance to see daylight we kin shoo' keep that darn streak from kin' wif our blood, does we kin?"

## Quick Mustard Plaster.

A trained nurse says that if one forgets the exact proportions for making a mustard plaster one can be quickly made by cutting a thick slice of bread, dipping it for just a second in hot water, then spreading with white of egg and applying to the skin with mustard. The egg will prevent blistering.

## OUR NEW PAPER MONEY.

It Will Be the Safest and Simplest System in the World.

When the new bill for Uncle Sam is now preparing appear our citizens will witness the greatest revolution that has ever been made in the size and appearance of paper money in the United States. Each one of the \$200,000,000 notes of that kind now in circulation will be supplemented by uniform pieces of currency about a quarter size smaller than that now used. If the comment occasioned by the establishment of parcel post, the rural free delivery and every other innovation Uncle Sam has made in the last twenty years could be rolled into one it would not bring forth a tenth part of the popular interest which will be manifested when the people realize that each and every piece of paper money is to be changed. That day will sound the doom of the counterfeiter who now raises a \$1 to a \$10, a \$10 to a \$20, a \$20 to a \$50 bill or, in fact, misrepresents any denomination.

The value of the new bill will be apparent on sight. Any note with Washington's portrait on it will be \$4; Jefferson's, \$2; Lincoln's, \$5; Grant's, \$10; Alexander Hamilton's, \$20; Andrew Jackson's, \$50; Franklin's, \$100; John Marshall's, \$500, and so on. It would then be utterly impossible for a forger to boost a one dollar bill to a ten dollar bill, as is so frequently done, because within a few months after the system has been in vogue every man, woman and child will have learned that George Washington's picture stands for \$1 and not \$10. We will then have the safest and simplest system of national currency in the world.—Leslie's.

## MOVING PICTURE SHOWS.

They May, Perhaps, in the Near Future Be Given in the Home.

A prediction may safely be made that in the near future provision will be made for moving pictures in the home. When a man decides to build a house to cost, say, \$25,000 or more, the architect will plan the picture room, in which the family and their guests can enjoy a select program of latest productions. It may be in connection with a dancing room, or it then be accomplished in much less space.

A projecting machine suitable for the home will not be very costly, and the films will doubtless be sold at low prices by companies organized for that special purpose. Travelers returning from abroad will find pictures of cities and scenes they have seen, and will find in reciting to friends and relatives incidents of the places they have visited.

Another new industry which will soon come into existence in all the larger cities will be film photography. Photographers' workshops, camera studios, weddings and other functions which in later days or years recall pleasant memories will thus be perpetuated by the film photographer. It will be considered as much a necessity as the orchestra. Undoubtedly one of the most acceptable wedding presents in days to come from parents to bride and groom will be a set of progressive films showing the children as they advanced from infancy to high school days. As a feature of the wedding festivities the pictures will afford amusement.—Popular Mechanics.

Britain's Be Disease Bill.

A curious difficulty caused the abandonment of a couple of weeks ago of one of the British government's minor measures. This was the be disease bill, which sought to impose penalties on persons sending diseased bees from one place to another by post. When the bill was under discussion it was remembered that there was nothing to prevent a diseased bee journeying on its own account. Infected swarms might even fly from one spot to another. On such a journey a bee, meeting an inspector, might refuse to stop and produce a health certificate. Hence it became apparent that the bill would be of little more than a farce.

Fortress of Silistria.

Should the Russian and Bulgarian to hand over Silistria as "compensation" for her maternal inactivity during the war she will have secured an almost impregnable fortress. Over and over again Silistria has been attacked and taken, but since the Russians last captured the city her fortifications have been regarded as invulnerable. By the congress of Berlin it was decided that the forts should be demolished; but, like some more important clauses in that "peace with honor" treaty, the decision was honored in the breach.—London Chronicle.

## Manhattan's Demolished Buildings.

If all the buildings torn down annually in the borough of Manhattan in New York city could be assembled they would make a good sized island. Last year the number of buildings demolished was 819, and a gas tank brought the total demolitions to 820.

The front feet measurement of the houses pulled down was 3,575, or approximately four and three-quarter miles. Nine houses out of ten destroyed were four stories high.

The Stenotype.

A new machine called the stenotype has been invented, which enables the shorthand writer to get out 400 to 600 words a minute upon paper in an absolutely correct and accurate form. The basis of operating the machine is phonetic spelling. It is but a shorthand typewriter. While the work done is virtually the same as done by shorthand, it has the advantage of being recorded in plain English characters.

## THE HOT WATER BAG.

How to Mend Holes in This Very Useful Article.

It is best not to entirely fill a rubber hot water bottle. When partly full rent it on something and press the top down until the water rises in the neck, then screw on the top. This drives out the air and keeps the water hot longer. A hot water bag will last much longer if at first it is waxed inside with olive oil or vaseline.

To mend a rubber bag first inflate with air and then flatten the cork so it will be covered in this manner. If you have a small piece of thin sheet rubber heat this also and paste over the gum while it is still hot. Adhesive plaster will also mend it neatly. There is also a rivet which is used for mending purposes. It has a flat head on one side, and the stem is threaded to secure a nut on the opposite end.

To mend rubber goods which are not subject to extreme heat melt gum dissolved in chloroform. Apply one piece and when that hardens place another and then a third layer, allowing each to dry thoroughly before applying the next. This makes a tight patch which is durable.

Do not throw the worn out hot water bag away, but cut it in round or oval pieces and use as mats to put under your feet.

In the absence of a hot water bottle or bag a common flannel bag, made in a convenient size, with a drawstring, will serve in ordinary ailments such as toothache, earache and other minor pains. Fill with hot sand or salt. It is as effective as a cheap rubber bag, just as efficacious and much handier to use. Keep a half dozen on hand.

A hot plate wrapped in paper and a soft towel will retain heat until the proper articles can be secured. Old magazines heated in the oven make a good substitute for a hot water bottle. They hold the heat nearly as long and can be used under the back, where a hot water bottle would not lie well.

## STREET SUITS.

Whims and Freakishness Reserved For Day Dress.

There seems to be an unwritten law in dressing that no matter what eccentric and freakish effect may be the whim of fashion, it shall be expressed solely in costumes to be worn by day. The only unusual or freakish note in the walking suit illustrated is to be found in the combination checked skirt with plain coat. This combination

YOGUR OF THE SEPARATE COAT.

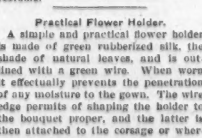

In fumigating by burning substances be careful not to set fire to the building. Reasoning also that in most cases the substances which are used are poisonous to human life and to fowls. Carelessness in their use or in leaving them about where children or child can get at them may have dire results.

How to Preserve Eggs.

Dip fresh eggs, one at a time, in hot melted paraffin, enough to cover the egg. Take out immediately with wire tongs and dip in water. Then dip in wire, let paraffin harden and dip quickly again, reversing egg. Let cool. Wrap each egg separately in waxed or paraffin paper. Wrap carefully, so as not to scratch or break the coating. Pack cold in tin fruit cans and seal with paraffin, which excludes the air. Eggs so covered air tight will keep several hours and then opened as thoroughly as possible to allow the wind to drive out any remaining trace of poisonous gas.

Handy Barn Door Latch.

Every farmer or houseman knows how annoying it is to open a barn door which will not latch by sliding or lifting the latch with his teeth or nose. The accompanying sketch of a simple and effective latch, which is fastener that will battle the efforts of

Practical Flower Holder.

To Make Plants Grow.

Plants will grow more quickly if a few drops of ammonia are added once a week. The water should be lukewarm, and the ammonia should be added to the water you use for watering.

## GOOD HORSE SENSE.

The horse is man's universal motor, without which he could not do a thing. To his present degree of civilization—could not even have emerged from savagery—yet he is so familiar that we are apt to take him for granted. No other animal is so important to human welfare, and his improvement by the use of modern appliances should be the care of every farmer as a mere matter of economy.—Kansas Farmer.

## IS IT "LAZY MAN'S WAY?"

Use of Commercial Fertilizers Discussed For and Against.

Mr. Fullerton, who, with his wife, is the head and front of the long Island experiment farms, discourses as follows on the use, or, rather, abuse, of commercial fertilizers. In answer to the question, "Aren't you ever going to use fertilizer, Mr. Fullerton?" he said: "Bless your souls, yes. Didn't you fertilize when I plowed that ryegrass? Next fall I am going out on a about ten tons to the acre of manure again, and I am going to turn under crimson clover, vetch and ryegrass on every square foot I get started."

"Then I shall use lime for a sweetener, for we now can afford the lime a little time to work. Next summer when I am plowing a second and third crop on the same ground I shall probably use blood and bone meal."

"Don't misunderstand me. I think the better they are for old, worn-out land, but it would be like 'carrying coals to Newcastle' to put them on virgin soil."

"The reason for chemical fertilizers has gone too far. There are places where they have put it on so heavy with the theory that if one ton is good two tons will be better. They have chemical laboratories, not farms. All chemical fertilizing is 'lazy man's way.' He claims he will not have weeds, so will use chemical fertilizers. The farmer's best friend will be the man who will cultivate, and lack of cultivation is the crime of modern farming. If they plow, harrow and land the soil, and now and so liberate through decomposition the various component parts of the chemical fertilizers they will have farms again."

## SMOKING OUT THE BUGS.

Fumigation a Good Way of Getting Rid of House Pests.

Fumigation is a means of reaching germs and insect life in the air of the room and in the cracks and crannies of the woodwork, says the American Cultivator. The house or room should be tightly closed and all fowls excluded. Fumigation may be done by burning a candle now sold at stores dealing in poultry supplies. The fumes of brimstone may also be produced by burning in a metallic basin such as an old iron kettle a number of rags previously soaked in nitered sulphur.

Sulphur may be mixed with a little alcohol or kerosene oil and burned, or it may be sprinkled upon live coals placed in a chafin dish. The house or room should be kept closed for several hours and then opened as thoroughly as possible to allow the wind to drive out any remaining trace of poisonous gas.

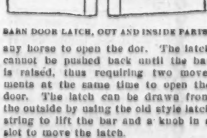

In fumigating by burning substances be careful not to set fire to the building. Reasoning also that in most cases the substances which are used are poisonous to human life and to fowls. Carelessness in their use or in leaving them about where children or child can get at them may have dire results.

How to Preserve Eggs.

Dip fresh eggs, one at a time, in hot melted paraffin, enough to cover the egg. Take out immediately with wire tongs and dip in water. Then dip in wire, let paraffin harden and dip quickly again, reversing egg. Let cool. Wrap each egg separately in waxed or paraffin paper. Wrap carefully, so as not to scratch or break the coating. Pack cold in tin fruit cans and seal with paraffin, which excludes the air. Eggs so covered air tight will keep several hours and then opened as thoroughly as possible to allow the wind to drive out any remaining trace of poisonous gas.

Practical Flower Holder.

To Make Plants Grow.

Plants will grow more quickly if a few drops of ammonia are added once a week. The water should be lukewarm, and the ammonia should be added to the water you use for watering.

## FATAL MATHEMATICS.

[A man should marry a woman half his own age plus seven years.—Old Maxim.]

See how the fate their skill combine To spoil a tale of "might have been." They met when he was twenty-nine And she was only seventeen.

For years in absence they adore Each other, just as lovers do. To greet when he is thirty-four And she, alas, is twenty-two!

When next their mutual gaze they fix The waiting time was nearly over. For he was going thirty-six And she admitted thirty-three.

They parted then 'twas fifty-four. It was a glorious sight to see. Until he totaled forty-five And she had reached thirty-three.

Their fates will never now entwine. Their courtship's course is nearly done. For she's a girl of forty-nine And he's a swain of eighty-one.

—New York Sun.

Possibly.

"Why do they call lawyers' briefs so?"

"Because they make their clients short."—Pittsburgh Press.

## Puzzled Him.

While going through country road the driver of an automobile saw ahead of him an old man walking by the roadside, also a dog. The dog was not content to remain on the side, but kept crossing the road and was caught by the car and instantly killed.

The driver turned the car as quickly as possible and went back where the damage had been done and found the farmer gazing sorrowfully at the remains of the dog. The driver took out his pocketbook and handed the man \$10, asking if that would pay for the dog. He said it would, so the other got in the car and went away. The old man watched the car as it was lost to view; then, taking off his hat to scratch his head, remarked, "I wonder who owned that dog?"—Harper's Magazine.

Quality of Hardness.

Paul Heller, the ether of beautiful children, died in New York of a certain hard quality in even the fairest American faces.

"Some of the most perfect faces I have seen," he said, "possessed that quality of hardness in a marked degree. They reminded me, indeed, of the girl to whom a sailor said:

"Now, Sammy Smith, where's a little love not by words only, but by deeds?"

"Well, George," said the young girl calmly, "did you bring the deeds with you?"—Detroit Free Press.

## Where It Was Signed.

The morning class had been duly instructed and enlightened upon the subject of our national independence. Feeling sure she had made a real and lasting impression with her explanations and blackboard illustration, the young teacher began with the usual round of questions.

"Now, Sammy Smith, where was the Declaration of Independence signed?"

Sammy, with a shout of glee: "At the bottom, ma'am—that's what you said!"—Ladies' Home Journal.

## Real Trouble.

The college professor who says that children are merely little imitators and knows no imagination should become acquainted with our little friends, Charles and John. One day John, aged three, came running to his mother in great distress. Upon inquiry the mother learned the cause of his tears.

"Mumver," wailed John, "Charles drew a picture of I got drowned, and he wouldn't draw a picture of he help me out!"—Judge.

## Approved.

"I see," said the second story man as he glanced over the paper, "that there's a society in New York for the suppression of unnecessary noises."

"And a good thing, too," said his pal, "if they'll only get after them bawling yells." They never alarmed a bawling yell.—New York American.

## Had Her Instructions.

Mrs. Subulus (to neighbor's child): "Oh, that's a beautiful fresh egg! I asked your mother to send over. How much are they, Mary?"

The Child—Pleasantly, it's 40 cents. But mother says if you grumble it's 35.—Boston Transcript.

## Attractive.

"Why won't you stage my play, 'How to Keep a Servant'?"

"It isn't much of a play."

"The name's enough. Every woman would go to only to see how the problem is solved."—Louisville Courier Journal.

## Keep Off the Grass.

"What does that sign say?"

"Keep off the grass."

"They have, haven't they?"

"You bet! They haven't let a blade grow."—Harvard Lampoon.

## Cookery Points.

Money and Junket.

Honey Gingerbread.—Put into a basin a cupful of honey and half a cupful of butter and melt it before the fire without stirring. Put into an enameled saucepan with half a cupful of sour milk, cut butterfully, two eggs beaten separately and half a teaspoonful each of ginger and cinnamon. Mix together till thick. Pour into a greased square tin and bake sharply.

Honey Trifle.—Beat gently over a cupful of milk and half a cupful of honey. Cut into cubes two sponge cakes and dip into the mixture; then pile into a dish. Mix a custard with two eggs, half a pint of milk and a cupful of honey. Pour the custard over the cakes, decorate with preserved fruit as preferred and serve either hot or cold.

Honey Mousse.—Beat separately the yolks of two eggs and mix with a cupful of honey. Beat gently over a cupful of milk and half a cupful of honey. Let the mixture be thick. Do not beat. Let it cool; then stir in the whipped whites of two eggs. Add a half pint of whipping cream, beat carefully. Put into a mold and set on ice to freeze.

Honey Fudge.—Holt together a cupful each of sugar and milk until it forms a soft ball. Add a cupful of cold water. Add a cupful of honey and boil until the mixture can be tested as before. Then add a pint of butter and a tablespoonful of vinegar. Mix all together and pour into shallow dish to cool.

Quite a variety of appetizing yet most nourishing cakes can be evolved with the aid of junket tablets.

Chocolate Junket.—Dissolve half a cupful of sugar in a quart of lukewarm milk. Beat two squares of chocolate, add half a cupful of warm milk and bring to the boil. Remove from the fire immediately and add remainder of the milk, quarter teaspoonful of vanilla and one dissolved junket tablet. Stir well and pour into small fancy cups to set. Now take half a cupful of thick cream, add half a cupful of cold water. Add a cupful of honey and boil until the mixture can be tested as before. Then add a pint of butter and a tablespoonful of vinegar. Mix all together and pour into shallow dish to cool.

Hot Milk Coffee Flavour.—Pour half a pint of boiling water over two ounces of coffee. Take a quart of milk. Beat two squares of chocolate, add half a cupful of warm milk and bring to the boil. Remove from the fire immediately and add remainder of the milk, quarter teaspoonful of vanilla and one dissolved junket tablet. Stir well and pour into small fancy cups to set. Now take half a cupful of thick cream, add half a cupful of cold water. Add a cupful of honey and boil until the mixture can be tested as before. Then add a pint of butter and a tablespoonful of vinegar. Mix all together and pour into shallow dish to cool.

Cocoanut Junket.—Sometimes a little junket is left over and is usually wasted. Here is a use for it. Take one cupful of cocoanut, one cupful of curd from which the whey has been poured, one cupful of cream, two yolks of eggs, half a cupful of sugar. Place all in a saucepan on the fire and stir till thick; then pour into a buttered pie dish and bake slowly for ten minutes.

## Fruit Sandwiches.

Fruit sandwiches are more generally used than they used to be and are so delicious that they ought to form a part of every sandwich repast. They satisfy a natural craving for sweets and are more wholesome and more easily made than cakes or candies.

Dates can be made into many savory pastes for sandwich filling. Make the foundation by stoning the dates and running them through the meat chopper. To a pound of this paste add the juice of an orange and the pulp that squeezes out with it. Put in a smooth and spread between buttered bread. To a half cupful of dates add a quarter cupful of chopped English walnut meats and two tablespoons of sugar and spread between buttered bread.

## Short Cuts.

A quick way to warm plates in cold weather is to dip them in hot water. Dry in a dish rack or with a towel. Invert the handles of knives, forks and spoons in a pitcher of hot water to warm them.

When covers lose the original knobs replace them with others that can be bought for 10 cents per dozen at a novelty store.

The flavor of fish is greatly improved if fried in fat saved from a former frying.

Stew three or four quinces soft. Rub through a colander and sweeten. Pour into a glass dish and cover with a custard made with one pint of milk, three eggs, salt and two tablespoons of sugar. Whip the whites of eggs light with three tablespoons of sugar and heap on top.

## Coffee Cake.

Take half a cupful of butter, a cupful of sugar, two eggs, half a cupful of molasses, half a cupful of coffee, two cupfuls of flour, half a teaspoonful of soda, a quarter of a teaspoonful each of cloves and mace and one tea-spoonful of cinnamon. Bake in a loaf pan.

## Olive and Egg Sandwiches.

Stone and chop twelve large olives and four finely chopped hard boiled eggs and enough melted butter to make a paste. Season with salt and pepper and mix together. Spread on bread from which the crust has been removed and press firmly together to serve.

## NOTICE TO CREDITORS

IN THE ESTATE OF BENJAMIN DUNCAN McDONAGH, late of the Town of Blairmore, in the Province of Alberta, Merchant, deceased.

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the late Benjamin Duncan McDONAGH, who died on the Twenty-third day of April, 1913, are required to send to Harry C. Moore, Barrister, Blairmore, Alberta, on or before the 31st day of July, 1913, a full statement of their claims and of any securities held by them, duly verified, and that after that date the administrator will proceed to distribute the assets of the deceased among the parties entitled thereof, having regard only to the claims of which notice has been filed with the said Harry C. Moore.

DATED at the Town of Blairmore, in the Province of Alberta, this second day of July, A. D. 1913.

HARRY C. MOORE,  
Solicitor for the Proposed Administrator.

— 4-7-3 —

## Mortgage Sale

NOTICE IS HEREBY GIVEN that by virtue of an Order of His Honor E. F. McNeill, Judge of the Supreme Court, Judicial District of Macleod, made under a certain cause, Lots Thirteen (13) and Fourteen (14), Block Five (5), according to a Map or Plan of record in the Land Titles Office for the South Alberta Land Registration District as Cannelly subdivision Bellevue 4177, will be sold on the 16th day of July, 1913, at 10 o'clock in the afternoon, or as soon thereafter as may be convenient, by Public Auction, in front of the Post Office in the Village of Bellevue, Alberta, subject to a reserve bid fixed by the Court, or a Judge thereof, terms to be made known at the sale.

The property consists of two lots having a frontage of thirty feet and a depth of one hundred feet, and are about two hundred and twenty-five yards from the Union Bank of Canada. On the lot there is a frame building Twenty-eight feet by sixteen feet by Ten feet, made of one ply of lumber and having a felt roof.

For further particulars apply to KEMMIS, THOMSON AND JACKSON, Solicitors, Pincher Creek, Alberta, Plaintiff's Solicitors.

DATED at Pincher Creek, this 26th day of June, 1913.

— 27-6-13 —

## For Sale

Six Lots, viz. 3 to 8, in Block No. 12, Pelletier Addition, Town of Blairmore, Alberta.

Also Lot 24, in Block No. 13.

## Happenings in and Around Bellevue

John Crawford visited Cranbrook on Monday.

Mr. and Mrs. Wm. Stafford moved up from Diamond City this week.

Mrs. James Allsup arrived from England on Monday evening's local.

Angus McDonald has returned to the camp after an absence of some months.

Mrs. McDicken arrived from Fernie on Tuesday, and is visiting with Mrs. G. W. Goodwin.

BOILED—At Bellevue, on Saturday, July 5th, to Mr. and Mrs. James Wilson, a daughter, Jeanie Martin.

Mr. and Mrs. Sheldon have arrived in the camp from Winnipeg and are staying with Mr. and Mrs. Fred Beal.

DIED—At Bellevue, on Saturday, July 5th, Jeanie Martin, infant daughter of Mr. and Mrs. James Wilson.

John Albert, the infant son of Mr. and Mrs. Fred Beal, was christened in the local church on Sunday evening last.

The burglar alarm at the local bank aroused some of the residents by going off at midnight on Thursday. It was a false alarm.

William Bowley, brother of "Our Frank," arrived from England this week. The brothers had not seen each other for 25 years.

"Protestantism" was the subject at the local church service on Sunday night last, in recognition of the 12th of July celebration this week.

The famous Bellevue band accompanied by a large host of Bellevue people, will attend the 12th of July celebration at Blairmore on Saturday.

Mr. and Mrs. Irwin attended the East Kootenay district summer school held on Moyie Lake, B.C. last week, where Mr. Irwin delivered his course of lectures on "Social Reform."

A very pretty wedding took place at the home of Mr. and Mrs. John Hutton at 4 o'clock on Saturday, July 5th, when their second daughter, Annie, was united in marriage to George Coupland, of Burnis. Rev. W. H. Irwin officiated. At the conclusion of the ceremony the happy couple and their friends sat down to a very dainty meal, after which the party adjourned to see the Hillcrest. On their return home dancing and merry-making was the order until the break of the Sabbath, when Mr. and Mrs. Coupland left by auto for their new home at Burnis. Miss Annie M. Orr, of Fernie, came up to assist the bride, while Isaac Hillcrest, brother of the bride, assisted the groom.

A large number of Bellevue sports were treated to the game of their lives on Saturday at Hillcrest, when the aggregations from the sister camps met for deadly combat. The exchange of goal keepers was a unique feature and the battle raged around the respective goals with unusual vigor. Fisher seemed out for revenge against the local team and almost succeeded in shutting Bellevue out without a score. Even his enemies are forced to admit that his work was marvelous. Bellevue's only score being off a close shot from Parker a few minutes before the final whistle. Patton, who wore the Bellevue colors for the first time, was no disappointment and will make good with Bellevue. The final score was 2 to 1 in favor of Hillcrest.

THE BEST MEDICINE IN THE WORLD

"My little girl had dysentery very bad I thought she would die. Chamberlain's Colic, Cholera and Diarrhoea Remedy cured her, and I can truthfully say that I think it is the best medicine in the world," writes Mrs. William G. Clark, Mich. For sale by all dealers.

## By-Law No. 24

A BY-LAW to provide for the borrowing of a sum of money for the purpose of constructing a sewerage system in the present water works system of the Town of Blairmore.

WHEREAS it is deemed expedient that the said Town of Blairmore, to construct certain sewers in the present water works system as a public work,

and WHEREAS it is deemed expedient that the said indebtedness created hereby be spread over a period of twenty years from the date on which this By-Law is to take effect,

and WHEREAS the amount of the rateable property in the Town of Blairmore, according to the last revised assessment roll is the sum of \$41,610.

That the total amount of the existing indebtedness of the Town of Blairmore is the sum of \$48,000 of which no part of the principal or interest is in arrears.

And WHEREAS the said Town of Blairmore has obtained from the Provincial Board of Health a certificate signed by the Chairman certifying as is provided in sections 11 and 12 of the Public Health Act, 1900, Chapter 12.

That the Mayor and Council of the Town of Blairmore enact as follows:

1. That the Council of the Town of Blairmore be and are authorized and empowered to borrow on behalf of the Town a sum of money not exceeding in the aggregate the sum of \$15,000.

2. That the said sum of \$15,000 be hereby appropriated for the purpose of constructing a sewerage system in the present water works system of the Town of Blairmore.

3. That the said indebtedness shall be paid during a period of twenty years from the date on which this By-Law is to take effect and shall bear interest at a rate not exceeding six per cent per annum.

4. That the said indebtedness shall be repaid by instalments of the sum of \$15,000 of principal and interest in equal annual payments or instalments equally divided and interest from the date of this By-Law and that the Council shall be authorized to borrow annually in the sum of \$15,000.

5. That the said indebtedness shall be repaid by the Corporation and signed by the Mayor and countersigned by the Secretary-Treasurer of the Town of Blairmore.

6. That the Council of the Town of Blairmore be and are authorized and empowered to pay the principal and interest of the said indebtedness out of the moneys of the Town of Blairmore.

7. During the currency of the said several provisions these shall be read annually at a special general rate on all rateable property in the Town of Blairmore at the same time and in the same manner as the ordinary Town taxes are assessed and the same shall be a condition of the said By-Law.

8. That this By-Law shall take effect and come into force on the day of the final passing of the same.

9. The votes of the burgesses of the Town of Blairmore on the 28th day of July, 1913, at the hour of ten o'clock in the forenoon in the said office of the Secretary-Treasurer of the Town of Blairmore, shall be final and conclusive for the purpose of the said By-Law.

10. That this By-Law shall be finally considered by the Council of the Town of Blairmore on the 28th day of July, 1913, at the hour of ten o'clock in the forenoon, and if the same be passed by the Council, the same shall be a condition of the said By-Law.

Read in open Council the first and second time the Town of Blairmore, this 28th day of July, A.D. 1913.

Signed, C. E. HISCOCKS, Returning Officer.

NOTICE TO THE Electors Of The Town Of Blairmore

Mrs. D. C. Drain and children accompanied by Mr. and Mrs. D. N. Drain, arrived from San Luis, California, on Saturday last.

J. W. Gresham's blacksmith shop was this week moved back to allow the erection of an implement and wagon apartment.

### Local and General

G. Fairo is erecting a bakery in west Blairmore.

W. H. Skinner, of Calgary, spent Wednesday in town.

At one p. m. Saturday the local meat markets will close for the day.

J. R. Warner is opening up the Putnam building as a boarding house.

H. G. Goodeve came down to the Sanatorium on Sunday for a "square."

S. W. Berry succeeds R. Bartlett in charge of the Blairmore Furniture Store.

D. R. McIvor and children, of Cowley, spent Wednesday forenoon in town.

T. Macdon, of the Windsor Hotel, Lundbreck, spent Sunday in the Metropolis.

Ninth Avenue has been graded and is now one of the finest thoroughfares in town.

The business houses will observe tomorrow, July 12th, by closing from 1 to 6 30 p. m.

The Cement Lodge has again changed hands and came into new management the past week.

An excellent shale pit has been unearthed by Messrs. McLeod and Beard on the Beard property.

L. W. Krebs has started the erection of a tenement house on his property fronting on State Street.

Rev. A. C. Watson, of Lethbridge, occupied the pulpit of the Central Baptist church on Sunday night.

J. Barrington Reilly, managing director of the Rocky Mountain Cement Co., was in town on Saturday.

The officers of Blairmore Lodge No. 68, I.O.O.F., were installed by District Deputy Reid on Tuesday night.

E. L. Crane, mechanical superintendent of "The Enterprise," landed a one-pound trout on Tuesday last.

Mrs. W. C. S. Hol Kirk, who recently paid a visit to relatives and friends in Kirkintiloch, Scotland, will return on Saturday.

Dick Marshall defeated Jud Foley in the ninth round of a scheduled fifteen-round bout at Sweet Grass, Montana, on Friday night.

A. L. Neadig, of Lethbridge, was in town on Tuesday to confer with the local committee in arranging for the Oddfellows' excursion and picnic on July 24th.

McLaren's mill is doing good work these days and on Tuesday exceeded the average daily turnout, putting some 67,000 feet of lumber past the saws.

The Blairmore senior baseball team defeated Hillcrest on Wednesday night to the tune of 3 to 2. In the start it looked as though Hillcrest were having matters all their own way, but the Blairmore boys reversed themselves and played with good effect at the finish.

The case of the Town versus Bradley came up for hearing last week and was adjourned. The case will be resumed today, L. H. Putnam for Bradley, H. C. Moore representing the town. This case arose over the non-compliance of Bradley to remove a building off the street line at Dearborn and Fifth avenue. It is expected the case will be thrown out of court and the building removed by the Town at the expense of the property.

All those who purpose attending the Provincial Interdenominational and Young People's Sunday School and Mission Study Conference to be held at Alberta College, Edmonton, July 22nd to 29th, are requested to purchase full fare one-way tickets and take standard certificates from local ticket agents. Special rates have been arranged on all railways. Further information may be obtained from A. E. Ottewill, Registrar of Summer School, University of Alberta, Edmonton.

The Lethbridge Wesley Sunday School excursion and picnic taken place at Calgary this year instead of the Crow's Nest Pass, and will be held on Friday, July 18th.

R. B. Bartlett and C. Lewis left Monday to seek their fortunes in northern B. C. Several eye-wipers were brought into requisition at the depot prior to their departure.

On July 12th, all the hotels will provide special service and be prepared to cater to the large number of visitors who will arrive to enjoy that holiday in the prettiest burg in Southern Alberta.

A resident of Frank was before Justice Gresham Monday morning charged with being drunk in a public place on Saturday. He pleaded guilty and forfeited the sum of \$5.50 being amount of fine and costs.

That mirth-provoking fellow, "Marka," the lawyer, and the equally irresistible "Topsy," are to be seen and heard again at the opera house tonight when Stetson's spectacular "Uncle Tom's Cabin" will be presented.

Vice-President Jones and Secretary Carter, of the U. M. W. of A. District 18, have resigned, and it is said will contest election on July 23rd, following their opportunity of explaining their positions in matters relating to the District Union.

The Alberta Grand Lodge of the Sons of England Society was instituted at Calgary on June 30th by Supreme President Miller and Supreme Secretary Carter, of Toronto. Fred T. Kolbins, of Lethbridge, was unanimously elected as the first Past Grand President.

Rev. D. Watkins-Jones, of Coleman, accompanied by Rev. M. Tait, were in town the beginning of the week. Rev. Mr. Tait has come to look after the Anglican mission at Blairmore and will assist the Rev. Jones in his work throughout this district. Services will be held for the next few Sundays in the Oddfellows' hall.

Two runaways occurred on Wednesday morning, one team belonging to F. W. Doubt and the other to the F. M. Thompson Co. The former stopped at the corral near the livery stable, while the latter after circling through the town was captured near the West Canadian mine. Considerable damage resulted to the wagons.

At the Alberta Hotel on Saturday the dining room will be open from 11:30 a. m. to 8 p. m., during which time regular dinners with cold meats will be served at the nominal price of 50 cents, and for those who desire to stay over to enjoy the Sunday in the Metropolis special room accommodation will be in readiness—Ad.

Superintendent Harshaw, of the Macleod-Cranbrook division of the C.P.R., passed west on Tuesday. The superintendent was interviewed by councillor Beebe with reference to the narrow crossing near the depot, and was assured that steps would be taken immediately to have the cattle guards removed so far back as to permit passengers from trains reaching the street without having to cross over them.

A fish story that's hard to beat: "Manager King, of the Alberta Hotel, went fishing the early part of the week. From a pool containing two gallons of creek water and covering an area of a cubic foot, he landed a fish measuring two feet from nose to tip of tail, five and a half inches in circumference, weighing two pounds and making a meal for one Blairmore lawyer." Guess he's a king-fisher!

One of the big scenes in Stetson's "Uncle Tom's Cabin," which will hold forth at the Blairmore opera house tonight is the Swanne River by moonlight. By the aid of lately invented mechanical and electrical devices, actual scenes for miles along the stream, made famous in song and story, are unfolded to the eye in all their mid-summer beauty. The setting is said to be one of the most beautiful and realistic stage pictures ever produced.

There has been much comment of late over the splendid condition of the road to the North Fork country, and we understand that a big portion of the credit for the condition of the highway is due to Stewart McDonald, a well-known resident of that part of the country. Stewart is one of those worthies who realizes the utility of waiting upon government grants and who is not afraid to better his own interests as well as those of his neighbor's by throwing off his coat and occupying his spare moments in the betterment of the public thoroughfare.

J. E. Woods was up from Pincher Creek this week.

The Wednesday half holiday came in vogue at Lethbridge last week.
